-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Akgul (2003/0074650).

What is claimed is:

Akgul

| 1. A method for debugging software code, said method comprising: | See the title and the abstract. |
| initiating a debugger thread on a computer system, wherein the debugger thread performs a plurality of debugger events; | See item 200 of fig. 2 and sect. 0044. |
| invoking an operational thread on the computer system using the debugger thread, the operational thread performing operational tasks; | See the last sentence of sect. 0044. |
| executing the software code using the operational thread; | See sect. 0052. |
| detecting whether the operational thread is functioning using the debugger thread; and | See sects. 0053-0054. |
| debugging the operational thread using the debugger thread in response to the detecting. | See sect. 0055. |
| 2. The method as described in claim 1 further comprising: receiving a request | See sect 0003 and 0018. |

Art Unit: 2193

from a software developer;

retrieving operational data from the operational thread using the debugger thread in response to the request; and

“ “ “ “

providing the operational data to the developer.

See sect. 0019.

3. The method as described in claim 2 wherein the operational data is selected from the group consisting of a register value, a code line failure value, an interrupt value, and a memory value.

See sects. 0019-0020.

4. The method as described in claim 2 wherein the operational data is one or more register values, and wherein the register locations are different from debugger register locations that are used by the debugger thread.

“ “ “ “

5. The method as described in claim 1 further comprising: loading a debugger operating system on the debugger thread;

See sect 0021.

and loading a primary operating system on the operational thread, wherein the debugger operating system is different from the primary operating system.

See sect. 0035.

6. The method as described in claim 1 wherein the computer system includes a plurality of dissimilar processors, wherein the operational thread and the debugger thread both execute on a common dissimilar processor from the plurality of dissimilar processors.

“ “ “ “

7. The method as described in claim 2 wherein the dissimilar processor is a processing unit.

“ “ “ “

In reference to claims 8-13 and 14-19, see the rejection of claims 1-6.

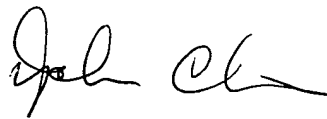

As per claim 20, see the rejection of claim 7.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Chavis whose telephone number is (571) 272-3720. The examiner can normally be reached on M-F, 8:00am-4:30pm, EST.
